

## Bracing and support for mild knee osteoarthritis

Quality for life

### What you need to know about mild knee osteoarthritis.

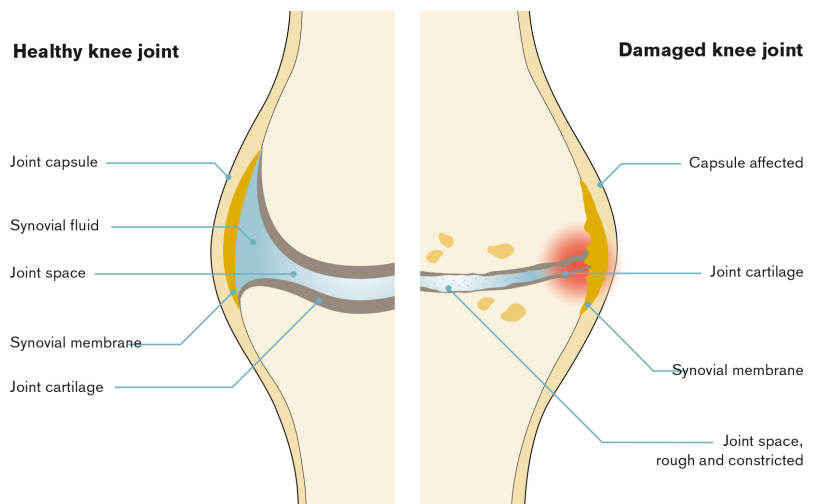

Mild osteoarthritis is a degenerative condition that causes pain and can limit your mobility. Mild knee osteoarthritis is the most common form of osteoarthritis. It occurs when the cartilage within the joint is damaged and no longer provides the cushion and lubrication necessary for normal movement.

### Signs and symptoms.

There are several common symptoms that signal mild knee osteoarthritis. They can occur individually or together. With the initial onset of the loss of cartilage, however, you may not notice any of these symptoms.

When symptoms appear, they usually occur in the following order.

- 1 Cracking in the joint
- 2 Pain during load-bearing activities, such as carrying heavy objects
- 3 Pain during daily activities, such as climbing stairs
- 4 Diminished mobility
- 5 Swelling and inflammation

There is no “one size fits all” solution for mild osteoarthritis. Talk to your specialist who will help you determine what is best for you.

# Product Solutions

## Agilium Vantage

Agilium Vantage is a lightweight, wraparound knee brace designed to help provide lasting pain relief for people with mild knee osteoarthritis.

With one pull, this brace uses the dynamic Y-shaped strap system to reduce pressure and may help relieve pain on the side of the knee that is most affected.

### Indications

Indications for use to be determined by your physician.

- ▶ Mild knee osteoarthritis
- ▶ Inner or outer knee pain
- ▶ Rheumatoid knee arthritis
- ▶ Post-operative knee support

### Overview

- ▶ Unloads the knee joint with a single pull to minimise rotation and may help reduce pain
- ▶ Low-profile design, easy to wear under clothes
- ▶ Four adjustable, numbered closure straps for quick and easy application
- ▶ Breathable material

### Genu Sensa

- ▶ Offers knee relief and stabilisation
- ▶ Beginning wear of the knee joint
- ▶ May help Relieve pain and improves knee joint function
- ▶ Promotes circulation
- ▶ Promotes the reabsorption of swellings and effusions

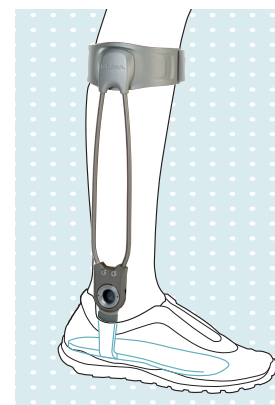

### Agilium Softfit

- ▶ Doesn't slip out of place thanks to innovative combination of materials
- ▶ Quick and easy setup to adjust incorrect knee positions
- ▶ Patella window prevents pressure on the kneecap
- ▶ Suitable for sports
- ▶ Can be worn under clothing

### Agilium Reactive

- ▶ Adapts to the contours of the body to accommodate different leg shapes
- ▶ TechnoGel pads include a skin-friendly fabric that allows for optimal pressure distribution
- ▶ Loosen the strap easily with a single movement
- ▶ Slimline design and construction make it very lightweight

### Agilium Freestep 2.0

- ▶ Worn on the foot and lower leg rather than around the knee
- ▶ Foot stirrup transfers weight to the lower leg to relieve the knee joint
- ▶ Comfortable to wear, does not constrict the knee while sitting
- ▶ The flexible sole can be tailored to fit any shoe.
